Healthcare / Transportation: Wayfinding, information kiosks, donor recognition

Hospitality: Guest engagement displays, concierge kiosks, digital directories

Command & Control: Real-time data visualization, dashboards, collaboration walls

Product Details: Hardware + Software Synergy

BUILT FOR VISUAL EXCELLENCE.

Absen's X Series LED displays combine brilliant image quality with reliable, all-in-one performance. Using advanced Flip-Chip COB Micro LED technology and optional touch interactivity, the X Series delivers deep contrast, vibrant color, and seamless visuals for any high-end interactive environment.

KEY FEATURES

Flip-Chip COB LED Technology:

Advanced Micro LED surface delivers deep blacks, brilliant contrast (15,000:1), and lifelike color for stunning visual fidelity

Optional Interactive Touch:

High-precision infrared touch with 1mm accuracy and 20-point multitouch support enables seamless collaboration and control.

All-in-One Design:

Integrated power, controller, audio, and display components—no complex wiring or configuration required.

Precision Engineering:

Slim, modern design with fast installation and easy front access for maintenance.

Sustainable Performance:

Energy-efficient design achieves up to 40% lower power consumption, with long-lasting durability for 24/7 operation.

POWERFUL. FLEXIBLE. EFFORTLESS TO USE.

MultiTaction's Showcase is an intuitive, no-code content presentation and engagement platform designed for touch-enabled environments. It lets integrators and end users transform static content into dynamic, interactive storytelling.

KEY FEATURES

Multi-Media Integration:

Combine videos, images, PDFs, and 3D objects into immersive, interactive experiences.

Intuitive Touch Navigation:

Enable gesture-based browsing with menus, filters, and categories for effortless exploration.

No-Code Customization:

Design and brand your experience using drag-and-drop templates—no developer required.

Offline Operation:

Run securely without an internet connection for reliable, fast performance in any environment.

Easy Content Updates:

Refresh media instantly via USB, LAN, or local drive—no specialized IT support needed.

Modular Design, Flexible Installation
